Portofoliu de 10 lucrări științifice relevante

1. Marinković, G., Koenis, D.S., de Camp, L., Jablonowski, R., Graber, N., de Waard, V., de Vries, C.J., Goncalves, I., Nilsson, J., Jovinge, S. and **Schiopu, A.**(2020). S100A9 Links Inflammation and Repair in Myocardial Infarction. Circulation Research, 127(5), pp.664–676. doi:https://doi.org/10.1161/circresaha.120.315865.
2. Marinković, G., Grauen Larsen, H., Yndigegn, T., Szabo, I.A., Mares, R.G., de Camp, L., Weiland, M., Tomas, L., Goncalves, I., Nilsson, J., Jovinge, S. and **Schiopu, A**. (2019). Inhibition of pro-inflammatory myeloid cell responses by short-term S100A9 blockade improves cardiac function after myocardial infarction. European Heart Journal, 40(32), pp.2713–2723. doi:https://doi.org/10.1093/eurheartj/ehz461.
3. Grauen Larsen, H., Marinkovic, G., Nilsson, P.M., Nilsson, J., Engström, G., Melander, O., Orho-Melander, M. and **Schiopu, A.** (2019). High Plasma sRAGE (Soluble Receptor for Advanced Glycation End Products) Is Associated With Slower Carotid Intima-Media Thickness Progression and Lower Risk for First-Time Coronary Events and Mortality. Arteriosclerosis, Thrombosis, and Vascular Biology, 39(5), pp.925–933. doi:https://doi.org/10.1161/atvbaha.118.312319.
4. Jonasson, L., Grauen Larsen, H., Lundberg, A.K., Gullstrand, B., Bengtsson, A.A. and **Schiopu, A.** (2017). Stress-induced release of the S100A8/A9 alarmin is elevated in coronary artery disease patients with impaired cortisol response. Scientific Reports, 7(1). doi:https://doi.org/10.1038/s41598-017-17586-6.
5. **Schiopu, A.**, Bengtsson, E., Gonçalves, I.S., Nilsson, J., Gunilla Nordin Fredrikson and Björkbacka, H. (2016). Associations Between Macrophage Colony-Stimulating Factor and Monocyte Chemotactic Protein 1 in Plasma and First-Time Coronary Events: A Nested Case–Control Study. JOURNAL OF THE AMERICAN HEART ASSOCIATION, 5(9). doi:https://doi.org/10.1161/jaha.115.002851.
6. Ovidiu Simion Cotoi, Pontus Dunér, Ko, N., Hedblad, B., Nilsson, J., Björkbacka, H. and **Schiopu, A.** (2014). Plasma S100A8/A9 Correlates With Blood Neutrophil Counts, Traditional Risk Factors, and Cardiovascular Disease in Middle-Aged Healthy Individuals. ARTERIOSCLEROSIS THROMBOSIS AND VASCULAR BIOLOGY , 34(1), pp.202–210. doi:https://doi.org/10.1161/atvbaha.113.302432.
7. Feng, G., Nadig, S.N., Liselotte Bäckdahl, Beck, S., Francis, R.S., **Schiopu, A.**, Whatcott, A., Wood, K.J. and Bushell, A. (2011a). Functional Regulatory T Cells Produced by Inhibiting Cyclic Nucleotide Phosphodiesterase Type 3 Prevent Allograft Rejection. SCEINCE TRANSLATIONAL MEDICINE, 3(83). doi:https://doi.org/10.1126/scitranslmed.3002099.
8. Nadig, S.N., Więckiewicz, J., Wu, D.C., Warnecke, G., Zhang, W., Luo, S., **Schiopu, A.**, Taggart, D.P. and Wood, K.J. (2010). In vivo prevention of transplant arteriosclerosis by ex vivo–expanded human regulatory T cells. Nature Medicine, [online] 16(7), pp.809–813. doi:https://doi.org/10.1038/nm.2154.
9. **Schiopu, A.**, Björn Frendéus, Jansson, B., Söderberg, I., Ljungcrantz, I., Araya, Z., Shah, P.K., Carlsson, R., Nilsson, J. and Gunilla Nordin Fredrikson (2007). Recombinant Antibodies to an Oxidized Low-Density Lipoprotein Epitope Induce Rapid Regression of Atherosclerosis in Apobec-1−/−/Low-Density Lipoprotein

Receptor−/−Mice. Journal of the American College of Cardiology, 50(24), pp.2313–2318. doi:https://doi.org/10.1016/j.jacc.2007.07.081.

10. **Schiopu, A.**, Bengtsson, J., SöderbergI., Janciauskiene, S., Lindgren, S., Ares, M.P.S., Shah, P.K., Carlsson, R., Nilsson, J. and Fredrikson, G.N. (2004). Recombinant Human Antibodies Against Aldehyde-Modified Apolipoprotein B-100 Peptide Sequences Inhibit Atherosclerosis. Circulation, 110(14), pp.2047–2052. doi:https://doi.org/10.1161/01.cir.0000143162.56057.b5.
