Organisational skills and competences	The evolution from the assistant professor position to that of full professor one, made me put all my best efforts in the personal development area (pofessional, scientific, social), as well as in the team activities area (as a member or coordinator). I was and am always open to dialogue and listening to what the others had to say and in doing that I asked for the other colleagues' oppinions. I was involved in the decision taking process, in trying to make the others take part in the scientific and clinical cases. All these things are standards that I tried to impose in all areas of my activity. Team spirit, correctness, selflessness and balanced approach are other standards that I always tried to maintain in relation to the other people and colleagues.All these aspects recommended me for the position of president of UNAS (National Union of Stomatological Associations) in 2 periods 2000-2002 and 2002-2004, vicepresident of UNAS (2010-2011) and president (from 2011) of Romanian Society of Prosthodontics and Maxillo-Facial Prosthetics, editor in chief of Romanian Journal of Dental Medicine, member of other editorial boards (Journal of Stomatology; Cosmetic Dentistry – Romanian edition). As General Manager and Secretary of State in Ministry of Health I coordinated with good results in my oppinion, two major fields of interes for those periods of time: 1. PHARE project and World Bank financed project (150 million \$); 2. direct negotiations regarding Romanian integration into EU, in all aspects concerning Ministry of Health
