

Prof. Christos Xenakis received his B.Sc. degree in computer science in 1993 and his M.Sc. degree in telecommunication and computer networks in 1996, both from the Department of Informatics and Telecommunications, University of Athens, Greece. In 2004 he received his Ph.D. from the University of Athens (Department of Informatics and Telecommunications). From 1998 - 2001, he worked with a Greek telecoms system development firm, where he was involved in designing and developing advanced telecommunications subsystems. From 1996 - 2007, he was a member of the Communication Networks Laboratory at the University of Athens. Since 2007, he has been a faculty member of the Department of Digital Systems of the University of Piraeus, Greece, where he is currently a Professor, a member of the Systems Security Laboratory and the director of the Postgraduate Degree Programme on "Cybersecurity and AI Technologies". He has participated in numerous projects realised in the context of EU Programs (ACTS, ESPRIT, IST, AAL, DGHOME, Marie Curie, Horizon2020, Horizon Europe) and National Programs (Greek). He is the project manager of the AIAS and NITRO EU-funded projects, while he was the project manager of the SECONDO, INCOGNITO, ReCRED, CUREX and SealedGRID projects, funded by Horizon 2020 and the technical manager of the UINFC2 project funded by DGHOME/ISEC. He is also a steering committee member of the European Cyber Security Challenge (ECSC) and the Hellenic Cyber Security Team leader. He is a member of the editorial board of three Thomson Reuters indexed journals: a) Computers & Security Journal of Elsevier Publishing, b) Computer Communications Journal of Elsevier Publishing, and c) the Computer Journal, Oxford University Press. His research interests are in the fields of systems, networks, and application security. He has authored more than 110 papers in peer-reviewed journals and international conferences.
