

Instructions for students in completing the answer sheets at exams using the UCAN platform

- For each exam, students will be present with the proof of identity (identity card, passport), a pencil, an eraser for the pencil and a blue/black pen.
- Since the answer sheets will be customized, with the name of the student already printed, it is no longer necessary to fill in an identification code. (*This fact will made impossible the changing of the answer sheet during the exam!*)
- It is mandatory for each student to complete the version of the question booklet/questionnaire (A, B, C, D) on the answer sheet. Not marking the correct version on the answer sheet, will lead to the impossibility of the student' exam evaluation/assessment.

In order to complete correctly the answer sheets and avoid possible mistakes, it is advisable to follow the following steps:

1. Initially you will mark the correct answers on the questionnaire/question booklet.

Ex.1

1. Which statemens are false, regarding the diaphragm :

- a. The splahnnc nerves cross the "Bochdalek" hiatus
- b. The frenic nerve originates at Th3-5 level
- c. The left hemidiaphragm is situated slightly inferior to the right one
- d. The diaphragm is the main ventilatory muscle

2. Marking the correct answers on the answer sheet will be done initially by a point applied with the pencil inside the circle corresponding to the option of the answer considered correct. If a mistake is subsequently detected, the pencil mark could be erased, and the new correct answer could be marked.

Ex. 2

- | | A | B | C | D | |
|---|----------------------------------|----------------------------------|-----------------------|----------------------------------|---|
| 1 | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | Answers initially marked with pencil : AD |
| 2 | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | Answers : BD |

3. The final mark of the answer sheet will be done only after all the markings have been self-verified, by applying an "X" with the pen over the pencil-marked circle. The X-shaped mark must be applied over the circle and may extend beyond its circumference.

Ex. 3

- | | A | B | C | D | |
|---|----------------------------------|----------------------------------|-----------------------|----------------------------------|---|
| 1 | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | Final answers marked by crossing the circle with the pen in X shape :AD |
| 2 | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | Final answers marked with the pen: BD |

Attention!!! - Do not use markers! Do not mark the area of the circle by shading/fulfilling the whole circle!

Examples of correct and wrong markings:

Correct marks

	A	B	C	D	
1					Correct answers:AD - The X shape mark can exceed the circle borders
2					Correct answers:BD - The X shape mark situated only inside of the circle is also correct
3					
4					Correct answers: CD - The X shape mark doesn't have to be exactly in the circle middle point

Wrong marks

	A	B	C	D	
1					The X shape mark is outside of the circle
2					The mark is insufficient, too small
3					Complete filling of the circle surface
4					The X shape mark fill almost completely the circle surface

Example of answer sheet generated on the UCAN platform with the first 30 answers marked
